

Book 7S contents

FM: indicates sections that address functional mathematics

Mental methods and starters

(Teacher's guide only) A teaching programme covering mental arithmetic skills; ideas for teacher-led activities for use at the start of a lesson

1 First bites 4 **FM: D**

Enjoyable activities to start year 7 and help the teacher get to know pupils and how they work

2 Symmetry 1 12

Making shapes with reflection symmetry; identifying symmetrical shapes and one or more lines of symmetry

3 Whole number calculation 20 **FM: BEFG**

Written and mental methods for adding and subtracting; adding and subtracting money; multiplication and division by a single-digit number; dealing with remainders

4 Oral questions: time 37 **FM: all**

For teacher-led question and answer sessions on reading the time from an analogue watch and calculating and using time intervals in hours and minutes

5 Growing patterns 38

Investigating sequences that arise from patterns of countable objects

6 Test it! 43 **FM: all**

Planning a survey, measuring accurately and collecting and recording data

7 Angle 47

Angle as turning; acute, obtuse, reflex and right angles; measuring; angles round a point and on a line; vertically opposite angles

8 Time 57 **FM: all**

Time of the day; time line; calculating time intervals; the 24-hour clock; transport timetables

9 Place value and rounding 63 **FM: E**

Place value; ordering large whole numbers; multiplying and dividing by 10, 100, 1000; rounding

Review 1 74

10 Using fractions 76

Fractions of a shape; fractions of a number; fractions on a pie chart

11 Balancing 87

Using balancing scales to introduce the idea of doing the same thing to both sides of an equation

12 Health club 92 **FM: all**

Getting information from a card-based database; dot plots, the median, including use to compare two groups, frequency bar charts, two-way tables

13 Understanding decimals 95 **FM: ABCG**

One, two and three decimal places, including use for metric lengths, weights and volumes; multiplying and dividing by 10, 100, 1000, ...

Pupils' book ISBN 978-0-521-53793-3

Teacher's guide ISBN 978-0-521-53794-0

Resource sheets for Books 7C, 7S and 7T ISBN 978-0-521-53796-4

Practice for Book 7S ISBN 978-0-521-53795-7

Order from educustserve@cambridge.org +44 (0)1223 325588

An assessment pack for books 7T, 7S and 7C is available from the SMP office: go to www.smpmaths.org.uk for details or email office@smpmaths.org.uk

14 Temperature 110 FM: all

Using and comparing positive and negative temperatures, calculating temperature changes; temperature tables and graphs; starting from a positive or negative number, adding or subtracting a positive number

15 Oral questions: money 1 118 FM: all

Picture of a market stall with priced items, for teacher-led question and answer

16 Coordinates 120

Recording information from an archaeological dig using positive and negative whole numbers and halves

17 Number patterns 125

Investigations; prime, square, cube and triangle numbers; sequences

18 Brackets 131

Brackets to show which part of a calculation is to be done first

Review 2 135

19 Rounding decimals 137 FM: ACD

Rounding to a whole number and to one or two places of decimals

20 Gravestones 144 FM: all

Reading from a table of data, grouping and tallying, various styles of frequency chart; testing a hypothesis; modal group

21 Oral questions: recipes 153 FM: all

Simple mental multiplication and division of food quantities

22 Work to rule 154

Finding and using the rule (linear relationship) for the number of white tiles from the number of red tiles in a given type of tile pattern

23 Triangles 164

Drawing a triangle from given lengths and angles; equilateral, isosceles and scalene triangles; sum of the interior angles of a triangle

24 Decimal calculation 179 FM: E

Without a calculator, adding and subtracting numbers with up to two places of decimals; multiplying and dividing them by a single digit whole number

25 Equivalent fractions and ratio 188

Equivalent fractions and simplifying; comparing, adding and subtracting fractions; simple ratio

26 Area and perimeter 195 FM: BC

Working out the perimeter of a simple shape and its area in cm^2 or m^2 (wholes and halves); the area of a right-angled triangle; splitting a shape into rectangles and right-angled triangles to work out its area;

Review 3 205

27 Spot the rule 207

Recognising number patterns and writing linear rules for them using words and algebra; finding inputs and outputs for simple linear rules

28 Chance 213 FM: AB

Deciding whether a game involves skill or chance and whether a game of chance is fair; probability scale; writing a probability based on equally likely outcomes as a fraction; choosing at random

29 Oral questions: calendar 221 FM: all

For teacher-led work on getting information from a calendar including calculating and using time intervals in days

30 Number grids 222

Number problems on grids containing numbers that follow linear rules going across and down; introducing algebra on these grids; simplifying linear algebraic expressions; proving simple general statements

31 Fractions and decimals 233

Equivalent fractions; comparing fractions; relating fractions to decimals; mixed numbers

32 Oral questions: measures 239 FM: all

Finding information from a table of data about the balls used in different sports

33 Inputs and outputs 240

Writing a linear expression for two operations (number machines); evaluating expressions; expanding simple brackets; using algebra to explain ‘think of a number’ puzzles

34 Action and result puzzles 249

Logical thinking using mental addition, subtraction, multiplication and division

35 Perpendicular and parallel lines 250

Right angles and perpendicular lines; the shortest route from a point to a line; identifying and drawing parallel lines

Review 4 259

36 Practical problems 262 FM: all

Tasks that require simple equipment and involve measuring, estimation and practical calculation skills

37 Comparisons 264 FM: all

Interpreting dot plots; median and range, and their use to make comparisons

38 Multiplying and dividing 275 FM: F

Multiplying by multiples of 10; multiplying two- and three-digit numbers using a range of written methods; division by a two-digit whole number without and with remainder

39 Think of a number 283

Using inverse operations to solve ‘think of a number’ puzzles and equations

40 Symmetry 2 291

Rotation and reflection symmetry

41 Hot and cold 299 FM: all

Sales simulation that involves number practice and estimation in a situation of uncertainty

42 Investigations 300

Advice on writing-up an investigation; ideas for investigations

43 Decimals with a calculator 307 FM: all

Deciding whether to add, subtract, multiply or divide to solve a problem, including finding the ‘best buy’

44 Three dimensions 316 FM: CD

Describing and drawing three-dimensional objects; interpreting drawings of them; views, nets and surface area

45 Percentage 322 FM: AFG

Introduction to percentages; converting between percentages, fractions and decimals; calculating a percentage of a quantity; expressing one number as a percentage of another; pie charts

Review 5 334

46 Fair to all 337 FM: all

The mean of a set of values; the mean from frequencies of values; distinguishing the median, mean and mode

47 Transformations 347

Reflection, rotation and translation of shapes on a grid, including use of coordinates

48 Negative numbers 354

Starting with a positive or negative number, adding and subtracting negative numbers

49 Oral questions: money 2 359 FM: all

Catalogue page with priced items, for teacher-led question and answer

50 Big numbers 360 FM: BC

Using millions and billions

51 Functions and graphs 362 FM: AB

Drawing and using the graph of a linear function; finding the function for a straight line graph

52 Multiples and factors 370

Multiples, factors and prime numbers; simple tests for divisibility; common multiples and common factors

53 Know your calculator 378

Priority of operations; brackets; use of a horizontal line for division; use of the memory; squares, square roots and negative numbers

54 Chocolate 388

Problem solving activity involving fractions

Review 6 388

Index 391
