

Higher transition contents

1 Calculation and estimation 8

- A Decimals and place value level 5 8
- B Multiplying by a decimal level 5 9
- C Dividing by a decimal level 6 10
- D Rounding whole numbers level 5 11
- E Rounding decimals level 6 11
- F Rounding to one significant figure 12
- G Rounding to two or more significant figures 13
- H Sensible accuracy 13
- I Mixed questions 14

2 Graphing changes over time 16

- A Fairground graphs level 6 16
(graph of level of water poured into different-shaped containers, general shape of graphs of other quantities changing over time)

3 Unitary method 20

- A Problems level 6 20
(scaling recipes, similar proportion problems)
- B Cancelling common factors 21
- C Using cancelling 23
- D Using a calculator 24
- E Dealing with units of measure 25

4 Fractions 27

- A Fractions review level 5 27
- B Ordering fractions level 6 28
- C Addition and subtraction level 6 29
- D Multiplying a fraction by a whole number level 6 30
- E Dividing a fraction by a whole number 31
- F Fractions of fractions 32
- G Multiplying fractions together 33
- H Changing between fractions and decimals level 6 34
- I Recurring decimals level 6 35
- J Mixed questions 35

5 Parallel lines and angles 37

- A Angles from parallel lines crossing level 6 37
- B Finding angles in two or more steps level 6 43

6 Percentages 47

- A Percentages, decimals and fractions level 6 47
(converting from one to another)
- B Percentage of a quantity level 6 48
- C One number as a percentage of another level 6 49
- D Percentage increase and decrease level 6 50
- E Increasing using a multiplier 51
- F Decreasing using a multiplier 52
- G Finding an increase as a percentage 54
- H Finding a decrease as a percentage 55
- I Mixed questions 56

7 Pie charts 59

- A Interpreting pie charts level 6 59
- B Drawing a pie chart using angles level 6 60
- C Drawing a pie chart using a percentage scale level 6 61
- D Mixed questions 62

Review 1 64

8 Pythagoras's theorem 66

- A The area of a tilted square 66
- B Squares on right-angled triangles 67
- C Square roots – a reminder level 5 70
- D Using Pythagoras 71

9 Working with linear expressions 75

- A Substitution level 5 75
- B Simplifying level 6 76
- C Brackets level 6 78
- D Dividing by a number level 6 80
- E Justifying number puzzles level 6 81

10 Representing 3-D objects 84

- A The Soma cube level 6 84
(volume, drawing on triangular dotted paper)
- B Nets level 6 85
- C Plan and elevations 86
- D Reflection symmetry level 6 88

11 Linear equations 92

- A Solving equations level 6 92
- B Forming equations from shapes level 6 93
- C Solving equations that involve brackets 94
- D Solving number puzzles 95

12 Multiples, factors and powers 97

- A Multiples, factors and primes level 5 97
(lowest common multiple, highest common factor)
- B Powers 99
(using index notation)
- C Multiplying powers 101
- D Prime factorisation 102
- E Highest common factor and lowest common multiple 104
(by examining prime factors)

13 Negative numbers 106

- A Calculating with positive and negative numbers level 6 106
- B Substitution 108
- C Equations with negative solutions 110
(including variable on both sides and brackets)

14 Drawing and using linear graphs 111

- A Drawing straight-line graphs level 6 111
- B Using graphs to solve problems level 6 114

15 Using a calculator 116

- A Brackets and order of operations level 5 116
- B Division level 5 117
- C Checking by rough estimates level 6 118
- D Other keys 118
(sign change, square, square root)

16 Changing the subject 120

- A Forming and using formulas level 5 120
- B Changing the subject of a formula level 6 122

17 Grid totals 125

- A Expressions from patterns on a number grid level 6 125

Review 2 128

18 Ratio 130

- A Writing a ratio in its simplest form level 5 130
- B Finding a value from a given ratio level 6 132
- C Dividing in a given ratio level 6 134
- D Converting between ratios, fractions and percentages level 6 135
- E Writing in the form $k:1$ and $1:k$ level 6 136

19 Substitution 138

- A Substitution review 138
- B Expressions with more than one letter 139
- C Units in formulas 140
- D Mixed questions 142
- E Using formulas in a spreadsheet 144

20 Scaling and ratio 146

- A Scaling drawings 146
(including decimal scale factors greater than 1)
- B Scaling down 149
(fraction and decimal scale factors)
- C Proportion within a shape 150
(finding and using e.g. $\frac{\text{longer side}}{\text{shorter side}}$)

21 Understanding inequalities 153

- A Single inequalities 153
- B Combined inequalities 154
- C Converting between words and symbols 156

continues >

22 Sequences 158

- A Sequences from shapes level 5 158
(number of elements in the n th shape)
- B Continuing linear sequences level 6 159
(term-to-term rules)
- C The n th term level 6 161
- D The n th term of a linear sequence level 6 162
- E The n th term of other sequences 163
- F Ways of seeing 164
(different spatial analyses of a given pattern and their algebraic equivalence)
- G Ways of seeing further 166
(extension questions)

23 Paired data 168

- A Scatter diagrams and correlation level 6 168
- B Line of best fit 170
- C Interpreting scatter diagrams 173

24 Working with coordinates 175

- A Shapes on a coordinate grid level 6 175
(revision of symmetry, area of triangle, equation of line parallel to the axis)
- B Mid-point of a line segment level 6 176
- C Mixed questions 177
(revision of area of parallelogram and circle, length of line segment between two given points)

25 Brackets and equations 180

- A Adding and subtracting expressions in brackets level 6 180
- B Further simplifying level 6 182
(involving multiplying or dividing linear expression by a constant)
- C Simplifying to solve an equation 183

26 Roots 184

- A Squares and cubes level 6 184
- B Square and cube roots 185
(including negative square roots)
- C Approximating a square root or cube root from a graph 186
- D Cube roots on a calculator 187
